SnakeSkin™

THE INTELLIGENT CHOICE FOR TRACER WIRE PROTECTION

SnakeSkin, by Copperhead Industries, will protect your tracer wire from damaging UV rays, weed whips and offers a direct access point to tracer wire locating your utility.

Corrosion and oxidization of tracer wire is never a problem with SnakeSkin. An aluminum barbed insert filled with dielectric gel serves as an easy direct connect access point that is rust free and corrosion resistant. Don't worry about it! Your wire connection will be protected by SnakeSkin.

Features and Benefits:

- ✓ Tracer wire direct connect access point
- ✓ Flexible and form fitting
- ✓ Multiple mounting configurations available
- ✓ Protection against weed whips, other lawn equipment, and curious kids
- ✓ Corrosion resistant
- ✓ Easy installation
- ✓ For new installs
- ✓ Retrofit kits are available for existing installations
- ✓ Follows the APWA color code for easy utility identification

Copperhead Industries provides “The Complete Tracer Wire System”.

The SnakeSkin is one more reason to rely on Copperhead for your demanding tracer wire needs.

Protect your tracer wire and locate connection with SnakeSkin by Copperhead.
